Test Driven Development

RED

- write a test
- · make it fail
- keep it simple
- tests are examples
- tests becomes documentation

GREEN

- get to green fast
- take baby steps
- stuck? undo and start over
- write only enough code to pass the test

REFACTOR

- remove duplication (in code and tests)
- rename and clean up
- run tests and stay green
- change implementation not behaviour
- improve structure in small steps
